

LENOX PIONEER POST

School News

At the end of October, our 6th graders went to Cedar Ridge, for Outdoor Science School. They were able to learn and experiment with many science concepts, and they had a great time, when they were there.

This month we had several days of no school. This was due to the fact that it was the end-of-quarter, we had parent/teacher conferences, and there were some holiday observations. Be sure to rest up, on the no-school-days, so you're ready to finish out the last 2019 three weeks of school strong!

Intermediate Feature

The 5th & 6th graders have decided to split into two different grades, for the rest of the year. The 5th graders are having math and science with Ms. Cairns and ELA and Social Studies with Mr. Jordan. This month Mr. Jordan's 5th grade ELA classes have started to read Esperanza Rising and are learning about human rights. In Mr. Jordan's Social Studies class, students are learning the 50 states and capitols of the United States of America. They are also learning about the Eastern Woodland Native Americans. Later, on December 5th, the 5th graders are going on a field trip to OMSI.

Primary Feature

This month, the kinders, in Ms. Timmons's class, have been having lots of fun with parties and art projects. Every morning, when the kinders arrive, they read the morning message and answer the question of the day. These questions are usually fun and humorous, like 'Would you want a pet monkey?' Surprisingly, the majority of the class said 'no'!

They are also learning about what animals need to survive, and they are focusing on bats.

For art projects, students painted some interestingly shaped pumpkins and drew many beautiful pumpkin flowers.

Whenever the class fills up the smiley face jar, they get to vote on a party. The party's for this month were a popcorn day and a stuffy day.

In math, these little smarties have been doing story problems and decomposing numbers. They are also learning how to read to themselves, how to write, how to listen to stories, and heart words. These are words to know by heart. They also need to know how to retell stories and show an understanding for characters.

These kinders are awesome! Keep up the great work!
Thanks Ms. Timmons for the great interview.

All About Ms. French

We were able to interview Ms. French, and here's what we found out.

What is your full name

Jessica Ashley French

Where were you born?

Portland, Oregon

When is your birthday?

April 21

Do you have any siblings?

a brother named Jason

How long have you been involved in education?

seven years

What college did you go to?

Oregon State --> Finished at Pacific University

Did you always know that you were going to be a teacher?

Yes!

What is your favorite subject to teach?

Science

If you had one superpower, what would it be?

To be able to fly

Is there anything else you would like to tell us?

She has a one-year-old dog, named Paris.
She loves the beach, and she is going to be an aunt in December!

Thanks so much, Ms.French .

News Around Us

A global group of around 11,000 scientists have endorsed research that says the world is facing a climate emergency. The study, based on 40 years of data on a range of measures, says governments are failing to address the crisis. (BBC News)

In Dubai, United Arab Emirates, a huge international robotics contest took place! Kids from 191 countries participated and were challenged with finding high-tech solutions to the problem of ocean pollution. More than 1,500 competitors ages 14 to 18 took part. The founder of the competition hopes that this competition will help in raising kids' awareness of pollution. He also hopes that his competition will fuel kids' interest in using technology to help with the pollution crisis. (Time for Kids)
